Air-Conditioning Units

Inventor Professional PFUVI-12WFI/PFUVO-12

Inventor Professional PFUVI-24WFI/PFUVO-24

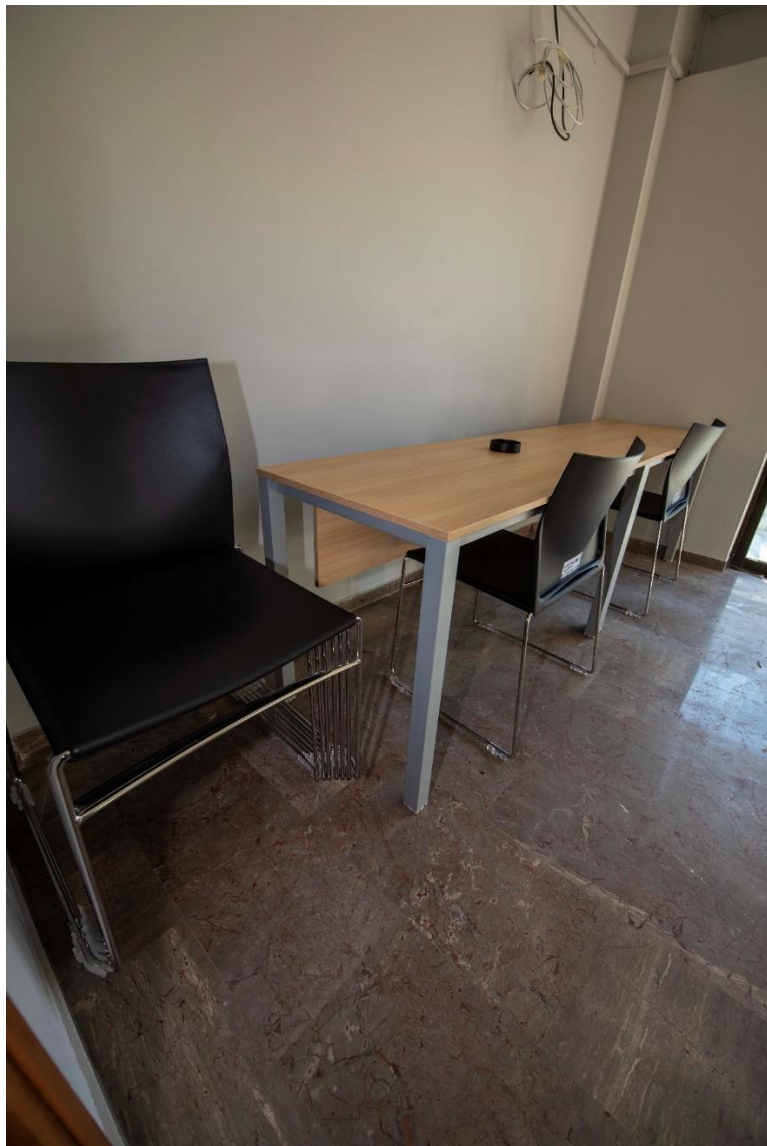

(Internal and External Units)

4 pieces in total (2 internal – 2 external units)

Indicative pictures of the furniture purchased

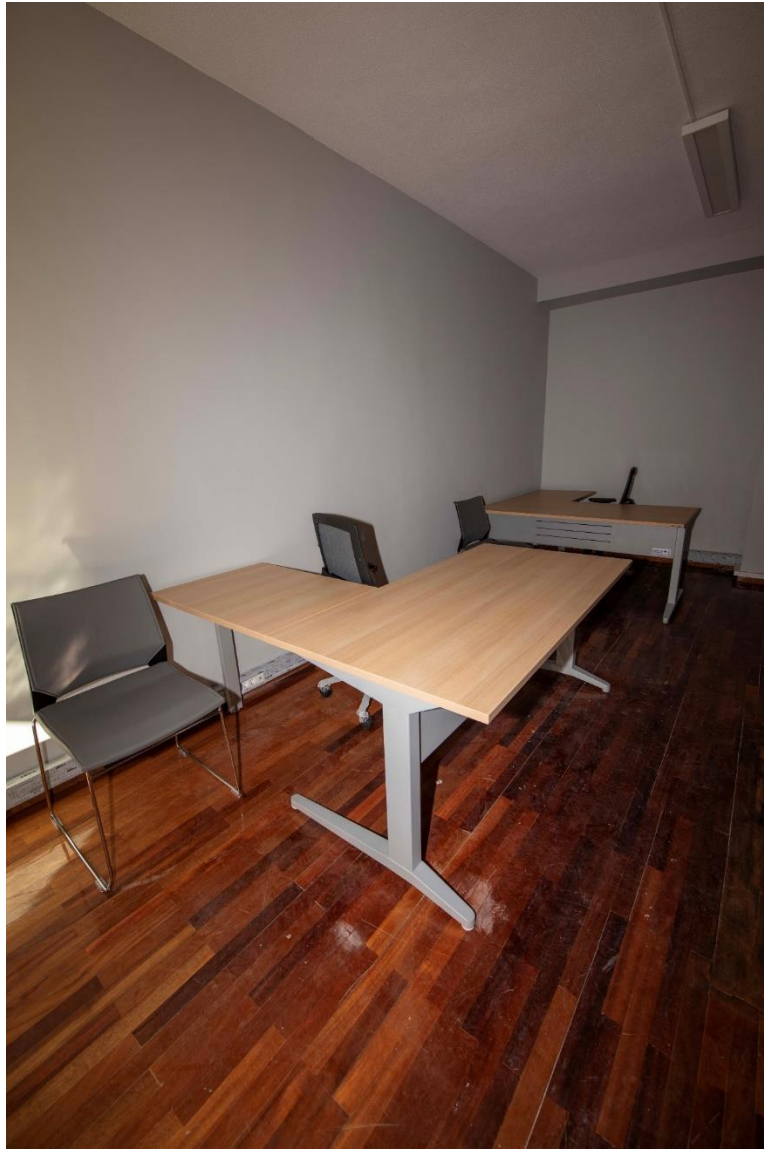

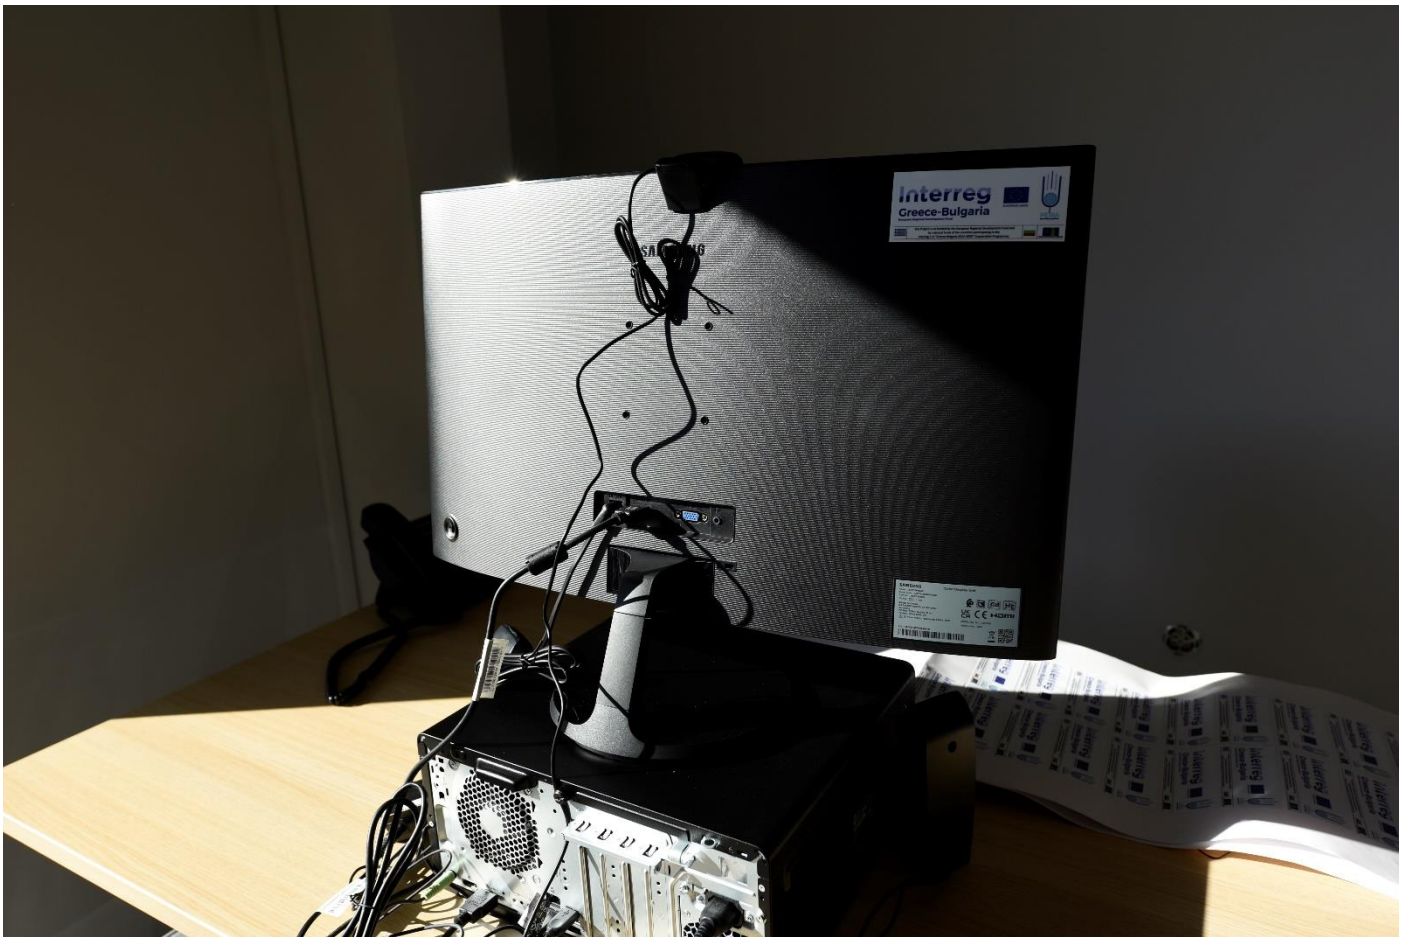

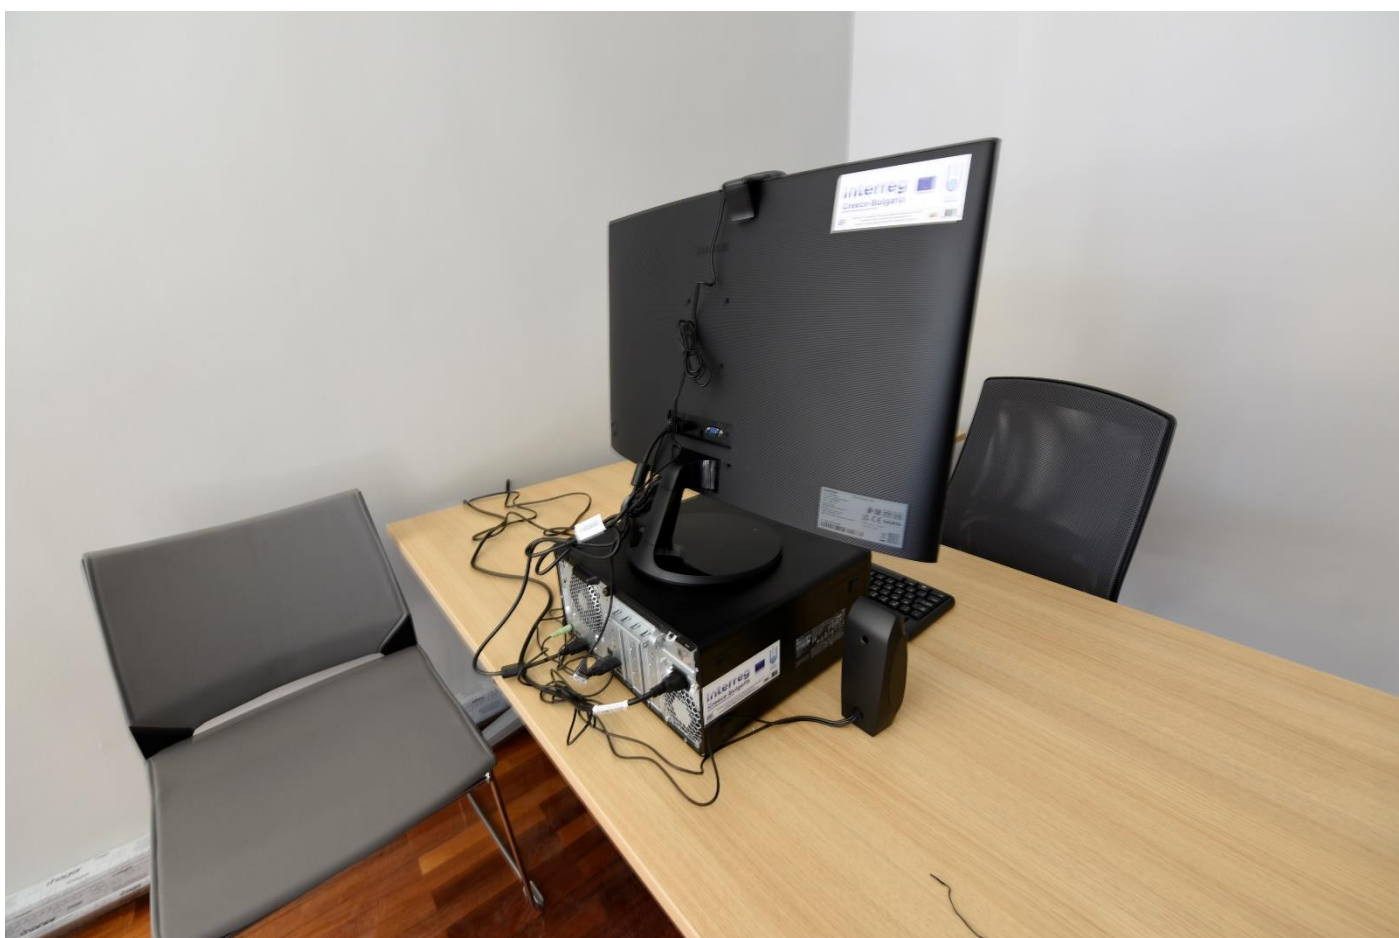

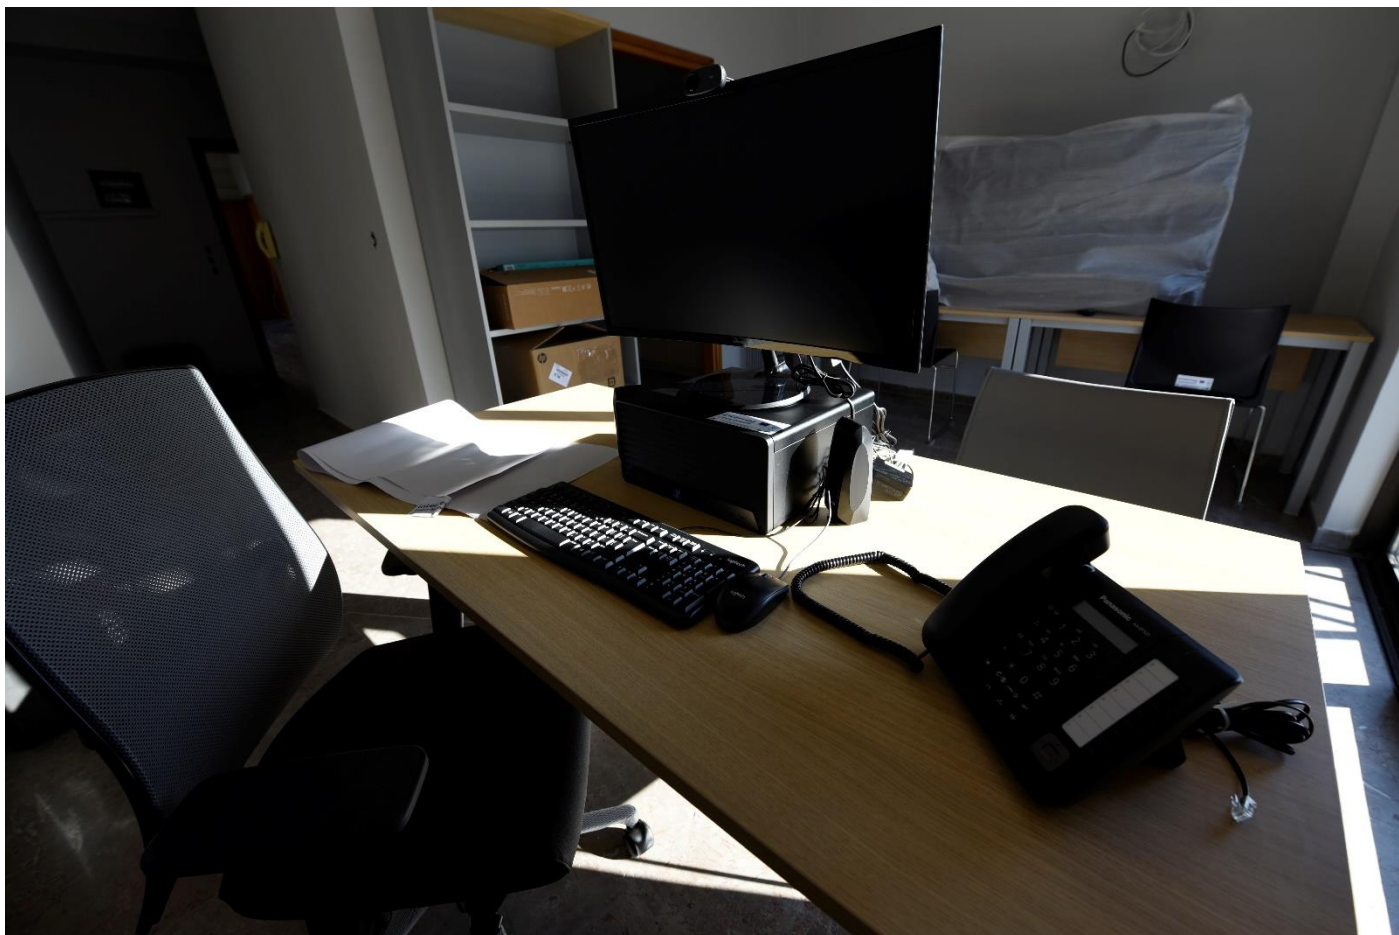

Indicative pictures of the IT Equipment purchased

Indicative pictures of the air-conditioning units purchased

Info sign (template provided by the programme) at the entrance of the office/building (RBSU) where the equipment is installed

Brief description

The main objective of the project is to promote entrepreneurship and innovation in the rural area of Kavala, Drama, Smolyan and Blagoevgrad by motivating, training and providing the necessary tools to rural entrepreneurs. This is achieved through the establishment of 4 Rural Business Support Units (RBSU), **which capitalize the PBs' experience and other assets in order to enhance rural areas' new and existing entrepreneurship**. The idea is to provide consulting, training, workshops, an innovation lab, an on-line consulting tool etc. as an integrated support, utilizing experienced consultants' know-how in order to supply them practical and easy to use knowledge (original approach as it covers real business needs to support micro-entrepreneurship). The Project's implementation is based on CB cooperation since RBSU's are delivering common consultation, tools and other services, which will also be developed jointly.

RBSUs have the capacity to achieve the motivation, training, consulting and support to rural area entrepreneurs of the CB area. In addition, the 4 RBSUs will ensure the development of a sustainable CB rural business network between Greek and Bulgarian companies.

According to the project's application, the LBs' premises was enhanced with a permanent Business Support Center with sustainability prospects. This will maximize its role to improve the rural areas' economy as they will keep providing services and tools especially after the project's completion (i.e. on-line consultation tool, toolkit books, consulting sessions, innovation lab, CB Rural Business Network etc.).

For the purposes of the current project, and as far as the LB is concerned, certain RBSU operations (such as training) have been conducted in the premises of other organisations within the Prefecture of Kavala (e.g. Chamber of Commerce) for reasons of space or convenience for the trainees.

The refurbishing process within the premises of the LB was delayed due to problems with permits and other administrative obstacles. This inevitably delayed the process of purchasing furniture and hardware by the PEIRA project. Notwithstanding the above delays, the equipment was installed at the RBSU with the purpose of serving the **sustainability goals of the project**, i.e. the operation of the network, the provision of specialised consultation of the people who attended previous training and consultation under PEIRA and wish to be funded by other programmes as well as to all those seeking to invest in the rural area of Kavala and Thassos. **The main goal of the LB is to operate the PEIRA RBSU for an indefinite period after the project's completion, and it has the intention and capacity to do so.**

In February 2024, selected participants will be invited at the RBSU to update their interest in investing, get informed on existing projects (CLLD/LEADER 23-27) and provide further ideas on new territorial cooperation projects such as INTERREG 23-27.
