POPULATION

PROJECT  
MEETINGS

## IDENTIFYING

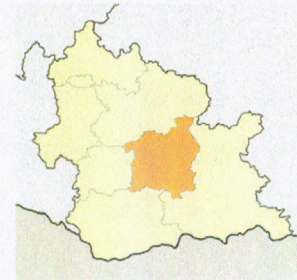

# THE MORBIDITY OF THE POPULATION

*in the Momchilgrad Municipality*

In the municipality of Momchilgrad, medical tests were done by taking blood samples aimed to 500 people, separated in two packages for man and woman living in the remote areas in Momchilgrad Municipality.

ОБЩИНА  
МОМЧИЛГРАД

## ANALYSIS OF LOCAL MORBIDITY

Participants in these medical tests were 73.6% woman and 26.4% men. The results from the laboratory found 306 new patients with diseases and blood abnormalities.

Most of them were circulatory system diseases – from 497 cases, 166 were discovered after the tests. Additionally endocrine system diseases which were 182 cases from which 85 discovered after the tests.

## PROJECT MEETINGS

- Transnational meeting with all of the Project Beneficiaries;
- Local informational seminar;
- Meeting with doctors about networking local health structures;
- Meeting with the local population in order to design and apply communication actions for applying common plain in project areas.
